[PDF] M4 Dynamics Variable Forces

M4 dynamics - variable forces physicsandmathstutorm . 1. a particle of mass m is projected vertically upwards, at time $t = 0$, with speed u . the particle is subject to air resistance of magnitude $\frac{1}{2} k v^2$ where v is the speed of the particle at time t and k is a positive constant. (a) show that the particle reaches its greatest height above the point of projection at time $\frac{1}{k} \tan^{-1} \frac{u}{k}$...

[PDF] The Wake Dynamics And Flight Forces Of The Fruit Fly

The time course of force generation by the flapping wings or by characterizing the structure of the resultant wake. these methods are not mutually exclusive, but are instead different approaches to the same problem. the derivation of mean flight forces from the wake is the underlying basis for the vortex theories of ellington (1984c) and rayner (1979a,b), which both use elaborations of the ...
