

Infectious Mononucleosis Medical Dictionary Bibliography Annotated

Chapter 1 : Infectious Mononucleosis Medical Dictionary Bibliography Annotated

Infectious mononucleosis (im, mono), also known as glandular fever, is an infection usually caused by the Epstein-Barr virus (EBV). Most people are infected by the virus as children, when the disease produces few or no symptoms. In young adults, the disease often results in fever, sore throat, enlarged lymph nodes in the neck, and tiredness. Infectious mononucleosis (mono) is a contagious illness typically caused by the Epstein-Barr virus. This infectious disease can be spread by saliva, and the incubation period for mono is four to eight weeks. Infectious mononucleosis (often called "mono") is a common viral infection that causes: fever, sore throat, enlarged tonsils, and; swollen lymph nodes. Any substance capable, under appropriate conditions, of inducing a specific immune response and reacting with the products of that response; that is, with specific antibody or specifically sensitized T lymphocytes, or both. AIDS definition: Acquired Immune Deficiency Syndrome (AIDS) is an infectious disease caused by the human immunodeficiency virus (HIV). There are two variants of the HIV virus, HIV-1 and HIV-2, both of which ultimately cause AIDS. A prefix that means one, only, single, as in monochromatic, having only one color. It is often found in chemical names where it means containing just one of the specified atom or group, as in carbon monoxide, which is carbon attached to a single oxygen atom. Infectious - translation to Spanish, pronunciation, and forum discussions. Hepatitis - translation to Spanish, pronunciation, and forum discussions.

In science, it is always a mistake not to doubt when facts do not compel you to affirm.--Pasteur. For the cost of Kyoto in just 2010, we could once and for all solve the single biggest problem on earth. First known use of mono. noun (1) 1959, in the meaning defined above. adjective. 1960, in the meaning defined above. noun (2) 1962, in the meaning defined above. Diarrhea is a common symptom of a gastrointestinal problem. It is characterized by frequent, loose stools and may be accompanied by stomach (abdominal) pain, cramping, nausea, vomiting, and fatigue. Find doctor-approved information about symptoms, causes, diagnosis, treatment and prevention of common diseases and conditions. What is maculopapular rash? Maculopapular rash is a compound word composed of the words "macule" and "papule." A macule is a flat blemish or discoloration that measures less than 1 cm. Uses: amoxicillin is used to treat a wide variety of bacterial infections. This medication is a penicillin-type antibiotic. It works by stopping the growth of bacteria. Antibiotic treats only bacterial infections. It will not work for viral infections (such as common cold, flu). unnecessary use

The common cold, also known simply as a cold, is a viral infectious disease of the upper respiratory tract that primarily affects the nose. The throat, sinuses, and larynx may also be affected. Signs and symptoms may appear less than two days after exposure to the virus. These may include coughing, sore throat, runny nose, sneezing, headache. Ozone therapy is safest known therapy. Ozone has been found to be an extremely safe medical therapy, free from side effects. In a 1980 study done by the German Medical Society for Ozone Therapy, 644 therapists were polled regarding their 384,775 patients, comprising a total of 5,579,238 ozone treatments administered.
