Science Fiction and the Prediction of the Future

Gary Westfahl, 2014-01-10 Science fiction has always challenged readers with depictions of the future. Can the genre actually provide glimpses of the world of tomorrow? This collection of fifteen international and interdisciplinary essays examines the genre's predictions and breaks new ground by considering the prophetic functions of science fiction films as well as SF literature. Among the texts and topics examined are classic stories by Murray Leinster, C. L. Moore, and Cordwainer Smith; 2001: A Space Odyssey and its sequels, Japanese anime and Hong Kong cinema; and electronic fiction.

The Fortress of Solitude Jonathan Lethem

2014-08-14 From the prize-winning author of *Motherless Brooklyn*, a daring, riotous, sweeping novel that spins the tale of two friends and their adventures in late 20th-century America. This is

sunstorm-a-time-odyssey-2-arthur-c-clarke

the story of two boys, Dylan Ebdus and Mingus Rude. They live in Brooklyn and are friends and neighbours; but since Dylan is white and Mingus is black, their friendship is not simple. This is the story of 1970s America, a time when the simplest decisions - what music you listen to, whether to speak to the kid in the seat next to you, whether to give up your lunch money - are laden with potential political, social and racial disaster. This is also the story of 1990s America, when nobody cared anymore. This is the story of what would happen if two teenaged boys obsessed with comic book heroes actually had superpowers: they would screw up their lives.

Rama: The Omnibus Arthur C. Clarke 2011-11-17

At first, only a few things are known about the celestial object that has arrived in the galaxy and has been dubbed Rama by the astronomers observing it. It is a huge cylindrical object, weighing more than ten trillion tons. And it is hurtling through the solar system at inconceivable speed. Then a space probe confirms the unthinkable: Rama is no natural object. It is, incredibly, an interstellar spacecraft. Space explorers and planet-bound scientists alike prepare for mankind's first encounter with alien intelligence. It will kindle their wildest dreams ... and fan their darkest fears. For no one knows who the Ramans are or why they have come. And now the moment of rendezvous awaits - just behind a

Raman airlock door.

The Space Trilogy Arthur C. Clarke 2001 The omnibus edition of three classic and inspirational Clarke tales ISLANDS IN THE SKY, first published in 1954, sees Roy Malcolm winning a trip to the Inner Station, a space station rotating 500 miles from Earth. THE SANDS OF MARS, set in the 21st century, has a group of pioneers struggling to change the face of this inhospitable planet. In EARTHLIGHT, two centuries hence, man has colonised the planets and the inhabitants of the Moon owe no allegiance to any nation on Earth - or to Earth itself ... This omnibus edition of three of Arthur C. Clarke's early novels shows the author of 2001: A SPACE ODYSSEY exploring space and time in adventurous and thoughtful ways.

writer and his acknowledged heir 1885, the North West Frontier. Rudyard Kipling is witness to a bizarre encounter between the British army and what appears to be an impossibly advanced piece of Russian technology. And then to a terrifying intervention by a helicopter from 2037. Before the full impact of this extraordinary event has even begun to sink in, Kipling, his friends and the helicopter crew stumble across Alexander the Great's army. Mankind's time odyssey has begun. It is a journey that will see Alexander avoid his premature death and carve out an Empire that expands from Carthage to China, beating the time-slipped army of Ghenghis Khan in a battle outside the ruins of Babylon in the process. And it will present mankind with two devastating truths. Aliens are amongst us and have been manipulating our past and our future. And that future extends only as far as 2037, for that is the date Earth will be

Flood Stephen Baxter 2009-07-23 From Terry Pratchett's co-author on the Long Earth books comes the ultimate disaster novel - the world is drowning and there is nowhere left on earth to go. Next year. Sea levels begin to rise. The change is far more rapid than any climate change predictions; metres a year. Within two years London, only 15 metres above the sea, is drowned. New York follows, the Pope gives his last address from the Vatican, Mecca disappears beneath the waves. Where is all the water coming from? Scientists estimate that the earth was formed with seas 30 times in volume their current levels. Most of that water was burnt off by the sun but some was locked in the earth's mantle. the waters would require the seas to triple their volume. That amount of water is still much less than 1% of the earth's volume. And somehow it is being released. The world is drowning. The biblical flood has returned. And the rate of increase is building all the time. Mankind is on the run, heading for high ground. Nuclear submarines prowl through clouds of corpses rising from drowned cities, populations are decimated and finally the dreadful truth is known. Before 50 years have passed there will be nowhere left to run. FLOOD tells the story of mankind's final years on earth. The stories of a small group of people caught up in the struggle to survive are woven into a tale of unimaginable global disaster. And the hope offered for a unlucky few by a second great ark ... *Sunstorm* Arthur C. Returned to the Earth of 2037 by the mysterious and powerful Firstborn, Bisesa Dutt is haunted by memories of her five years spent on the strange alternate Earth called Mir, a jigsaw-puzzle world made up of lands and people cut out of different eras of Earth's history. Why did the Firstborn create Mir? Why was Bisesa taken there and then brought back just a day after her disappearance? Bisesa's questions are answered when scientists discover an unnatural anomaly in the sun's core—evidence of alien intervention more than two thousand years ago. Now plans set in motion by inscrutable observers light-years away are coming to fruition in a sunstorm designed to eradicate all life on Earth in a bombardment of radiation. As the apocalypse looms, religious and political differences on Earth threaten to undermine every countereffort. And all the while, the Firstborn are watching. . . . Titan Stephen Baxter 2013-04-11 Signs of life have been found on Titan, Saturn’s largest moon.

The Yoga of Time Travel Fred Alan Wolf 2012-12-20 Time travel is not just science fiction; it may actually be possible. Wolf draws on yoga and quantum physics to show that time is a flexible projection of mind. Cheating time, he says, is an ancient metaphysical idea from the Vedas having to do with moving through meditation to a place where time stands still.

How the World Was One Arthur C. Clarke 2011-09-29 Arthur C. Clarke has been one of the most influential commentators on - and prophets of - the communications technology which has created the global village. Now, drawing partly on his own

sometimes very personal writings, he provides an absorbing history and survey of modern communications. The story begins with the titanic struggles to lay transatlantic telegraph cables in the nineteenth century. Fighting against widespread scepticism, lack of funds, technical disasters and setbacks - and against the Atlantic itself, above and below the surface - the pioneers achieved the seemingly impossible and by 1858 Britain and America were linked by Telegraph. Nearly a century later, as the first transatlantic telephone cable was being laid, the technology that would rival and perhaps even supersede it was undergoing its painful birth as scientists developed the communications satellite precisely as Clarke first described in his famous 1945 article *Wireless World*, 'Extra-terrestrial Relays', reprinted in this book. The rivalry between cable and satellite continued through the decades. Communication satellites

(Comsats) performed even beyond the most optimistic expectations, but cable fought back with the development of the transistor. Then, in one of the most dramatic and unexpected breakthroughs in any technology, the potential of cable systems was transformed. The development of fibre optics technology meant that once more the seabeds of the world began to be draped with the newest and most sophisticated artefacts of human engineering. It is an enthralling story, filled with extraordinary events and people, and Arthur C. Clarke brings all his storytelling flair and scientific expertise to bear on it. The result is a superb combination of history, comment and challenging speculation.

Ultima Stephen Baxter 2014-11-27 Fresh from his latest collaboration with Terry Pratchett on the Long Earth sequence Stephen Baxter now returns to the mysteries and challenges first hinted at in his acclaimed novel PROXIMA. In PROXIMA we

discovered ancient alien artifacts on the planet of Per Ardua - hatches that allowed us to step across light years of space as if we were stepping into another room. The universe opened up to us. Now in ULTIMA the consequences of this new freedom make themselves felt. And we discover that there are minds in the universe that are billions of years old and they have a plan for us. For some of us. But as we learn the true nature of the universe we also discover that we have countless pasts all meeting in this present and that our future is terrifyingly finite. It's time for us to fight to take back control. This is grand scale, big idea SF of the best possible sort. It is set to build on the massive success of PROXIMA and define Stephen Baxter's work going forward.

centuries between these two events pass, as Britain emerges from the ruins of Roman rule to become a vibrant, rich power in its own right, as invasions ebb and flow and Kings rule and die, a single thread is spun and stretched. A prophecy found in the shadow of Hadrian's crumbling wall, a prophecy preserved by the monks at Lindisfarne. A prophecy remembered, a prophecy handed down. A prophecy that speaks of the cross, of dragons from the north. Of a new world and of a new empire. A prophecy fulfilled in one remarkable year: 1066. CONQUEROR is a fast moving historical thriller that casts a bright light onto a shadowy period of British history and brings it to vibrant life. Steeped in blood and violence this was also a time of artistic endeavour, a time of nation building and law-giving. And it is a time of chance, where history can be shaped by the Weaver ...

biggest names in SF together again, with the third of the acclaimed Time's Odyssey sequence With this epic tale of altered histories and different earths, a universe where Alexander's empire prompted a different past, a world where strange alien 'eyes' gaze upon a fractured reality, a time when man is looking to colonise the red planet, Arthur C. Clarke and Stephen Baxter scale new heights of ambition and sheer story telling brio. This is classic SF adventure from two of the biggest names in the genre. A heady combination of high concept SF, big engineering projects and human drama.

More than a century of ecological damage, industrial and technological expansion, and unchecked population growth has left the Earth on the brink of devastation. As the world's governments turn inward, one man dares to envision a bolder, brighter future. That man, Reid Malenfant, has a very different solution to the problems plaguing the planet: the exploration and colonization of space. Now Malenfant gambles the very existence of time on a single desperate throw of the dice. Battling national sabotage and international outcry, as apocalyptic riots sweep the globe, he builds a spacecraft and launches it into deep space. The odds are a trillion to one against him. Or are they? "A staggering novel! If you ever thought you understood time, you'll be quickly disillusioned when you read *Manifold: Time*."—Sir Arthur C. Clarke

SHORTLISTED FOR THE WOMEN'S PRIZE This novel from the internationally bestselling author of *The Little Stranger*, is a brilliant 'page-turning melodrama and a fascinating portrait of London of the verge of great change' (Guardian) It is 1922, and London is tense. Ex-servicemen are disillusioned, the out-of-work and the hungry are demanding change. And in South London, in a genteel Camberwell villa, a large silent house now bereft of brothers, husband and even servants, life is about to be transformed, as impoverished widow Mrs Wray and her spinster daughter, Frances, are obliged to take in lodgers. For with the arrival of Lilian and Leonard Barber, a modern young couple of the 'clerk class', the routines of the house will be shaken up in unexpected ways. And as passions mount and frustration gathers, no one can foresee just how far-reaching, and how devastating, the disturbances will be. This is vintage Sarah Waters: beautifully

At her greatest, Waters transcends genre: the delusions in *Affinity* (1999), the vulnerability in *Fingersmith* (2002), the undercurrents of social injustice and the unexplained that underlie all her work, take her, in my view, well beyond the capabilities of her more seriously regarded Booker-winning peers. But *The Paying Guests* is the apotheosis of her talent; at least for now. I have tried and failed to find a single negative thing to say about it. Her next will probably be even better. The Green Odyssey Philip José Farmer 2016-03-10 The Green Odyssey' is an uproarious, hell-bent adventure story, combining fantasy, imagination and science, with a liberal dash of humor. It is in the best tradition of adventure science fiction, a swashbuckling tale of a resourceful spaceman who is, however, uneasily aware that he may have been miscast. Fortunately, he has the assistance of a large, gorgeous, energetic and adoring female who is

supremely confident of his ability to handle all comers. With her help, that is. Alan Green was not exactly a hero. In fact he liked peace just as well as the next man. Not that he was really afraid of that crazy, hot-blooded hound-dog Alzo, or even of the hound's gorgeous owner, the Duchess Zuni-who was also hot-blooded (to say nothing of the Duke). After all, these things were understood on this backward, violent planet, and a man could manage, provided he was alert twenty-four hours a day.
